

Chemistry Days Young Researcher Symposium (KP2024-YRS): Abstract Template

First F. Author¹, Second S. Author², and Third T. Author¹

¹Institute of the first author, address, country

²Institute of the second author, address, country

This is the template for all abstracts at the Chemistry Days Young Researcher Symposium (KP2024-YRS) taking place on 11th of April, 2024 in conjunction with the ChemBio fairs in Messukeskus, Helsinki.

We request that all authors enforce this template when submitting their abstracts whatever the form of the presentation is. The generally enforced final deadline for poster abstract submission is **October 20th, 2023**. After this date no submitted abstracts are to be included in the planning of the Symposium nor to be included in the Abstract Book.

The abstracts should be single A4 page documents and the body text should be written in 12pt Times font. One figure can be included. The abstracts are to be submitted by deadline via email to KP2024-YRS@jyu.fi as Word or PDF files.

Some of the submitted abstracts will be accepted as Oral communications (15 min incl. discussion) or Short talks (10 min incl. discussion) during the YRS. The abstracts not chosen for presentation as oral communication or short talk are considered as abstracts for poster presentation. Authors will be notified of the type of presentation granted by November 15th, 2023 the latest. The choice for the abstract for various modes of presentation is made by the organizing panel responsible for the Symposium at Chemistry Days 2024.

The poster boards used by the Symposium are of A0 size and portrait setup. Posters will be fixed with pins on a soft fabric surface.

All abstracts will be printed in the abstract book to be available publicly on the Chemistry Days webpage before and after the KP2024-YRS. By submitting their abstracts for the Symposium, the authors also acknowledge this and accept that their abstract will be made public in the abstract book by the Finnish Chemical Society.
